

# PathTROL™ Calprotectin Controls

## Post Extraction Faecal Calprotectin Controls

PathTROL™ Calprotectin Controls are lyophilised positive control sera, containing human calprotectin at 3 levels. They are designed for the continuous, long term internal quality control of Faecal Calprotectin assays in clinical and research laboratories.

- Independent Controls for Routine Internal Quality Control
- Extracted Controls
- Specific Target values for EliA®, fCAL® turbo and LIAISON® Calprotectin assays
- PathQAS™ Calprotectin, Peer-to-Peer iQC scheme included

The PathTROL™ Calprotectin A Controls are supplied with target values for Phadia EliA® Calprotectin assays, whilst Calprotectin B controls have assigned values for BÜHLMANN fCAL® turbo and DiaSorin LIAISON® Calprotectin assays.
