

Complete solution to support patient's health vs SARS-CoV-2

Quantification of Immuno-status of patients after infection or vaccination

Chorus SARS-CoV-2 "Neutralizing" Ab

Quantitative determination of total antibodies IgG ,IgM and IgA

Standardized against the first WHO International Standard

Quick and reliable detection of viral antigen in suspected Covid-19 patients

Semi-Quantitative determination of antigen in nasopharyngeal swab

Chorus SARS-CoV-2 Antigen

Complete panel for the identification of the antibodies response

Chorus SARS-CoV-2 IgG, IgM, IgA and Screen Serum

Qualitative tests to screen the specific immunoglobulin levels during the different phase of the infection

- **Single-test devices**
- **Easy and ready-to-use**
- **No hidden costs**
- **No waste of reagents**

Diesse 4 Covid 19

Coronavirus disease

QUALITATIVE TEST ON SERUM SAMPLE

Chorus SARS-CoV-2 IgA

For the qualitative determination of IgA antibodies anti-SARS-CoV-2 virus.

36 tests

N27-81402

Chorus SARS-CoV-2 IgG

For the qualitative determination of IgG antibodies anti-SARS-CoV-2 virus.

36 tests

N27-81400

Chorus SARS-CoV-2 IgM

For the qualitative determination of IgM antibodies anti-SARS-CoV-2 virus.

36 tests

N27-81401

Chorus SARS-CoV-2 Screen Serum

For the qualitative determination of total antibodies anti-SARS-CoV-2 virus as an aid in the determination of the immune reaction to SARS-CoV-2.

36 tests

N27-81406

SEMI - QUANTITATIVE TEST ON SWAB SAMPLE

Chorus SARS-CoV-2 Antigen

For the semi-quantitative determination of SARS-CoV-2 virus in nasopharyngeal swab.

36 tests

N27-81410

QUANTITATIVE TEST ON SERUM SAMPLE

Chorus SARS-CoV-2 "NEUTRALIZING" Ab

For the quantitative determination of total antibodies anti-S1 SARS-CoV-2 virus as an aid in the determination of the immune reaction to SARS-CoV-2 or to the vaccine

36 tests

N27-81408
